## Ajax without jQuery

Load Text Content (No jQuery)

This is a sample text.....HTML (HyperText Markup Language) is a markup language used to build web pages and applications. It tells web browsers how to display text, images, links, and other content, and it forms the foundation of most websites. HTML consists of elements or tags that enclose content and define its role, such as headings, paragraphs, lists, links, images, tables, and forms.

## Ajax with jQuery

Load Text Content (jQuery)

This is a sample text.....HTML (HyperText Markup Language) is a markup language used to build web pages and applications.
